Mfuwe Day Secondary School
P.O. Box 48
MFUWE.

24th July, 2009

Dear Markus and Marrian Wergner,

Mfuwe Day Secondary school Management, Staff, Board and PTA would like to thank you most sincerely for rendering support and donations to the school. The donations have gone a long way in improving the bad state of the school.

Mfuwe Day Secondary School was opened in January 2001 to provide secondary education for the pupils whose parents cannot afford to take them to distant expensive boarding schools in other Districts and towns. The school was opened with the aim of accessing pupils in South Luangwa Valley to secondary education. Far away schools demand huge expenses from pupils whose parents are poverty stricken. Due to a number of challenges the school has been running on 'thick and thin'. The major challenges have been lack of infrastructure and teachers accommodation.

Your prompt and positive response to our aid is something which the teachers, pupils and the local community will not forget at all. The pupils in the boarding at this school were literally sleeping on the rough and hard floor. Nights were horrible and seemed long for our pupils. The school is very thankful and appreciative for providing bunk beds and mattresses to the boarding section. There is now a tremendous change at the dormitory resulting in the pupils staying happily. A lot of pupils are now applying for places in the boarding because of the dormitory.

The school has for a long time now, been encountering other problems such as the lack of stationery and equipment for use in the administration, management and conduct of assessments and examinations. The school is very thankful to you for donating a copier to us. The copier came at a time the school needed it most. Had it not been for your donation, the school would have failed to conduct end of term and year examinations.

We are thankful and grateful for partnering with us in our endeavor to improve the bad shape and status of the school. Our goal is to provide quality education to the pupils in the remote South Luangwa Valley.

Thank you.

A.J. BANDA
